

Modern | Contemporary | Premium

The Original . . . Sunshine Door, featuring . . .

Triple Wall Polycarbonate

140 times Stronger than glass.

Triple Wall for Triple the Energy Efficiency

One Piece Polycarbonate the Full Width of your garage door for the best in structure and thermal performance.

Strong Extruded Aluminum Framework.

Integral Reinforcing Truss inside for Structural Integrity.

Let The Sun Shine In with Up to 82% Visible Light.

Premium & Wood Grain Panels

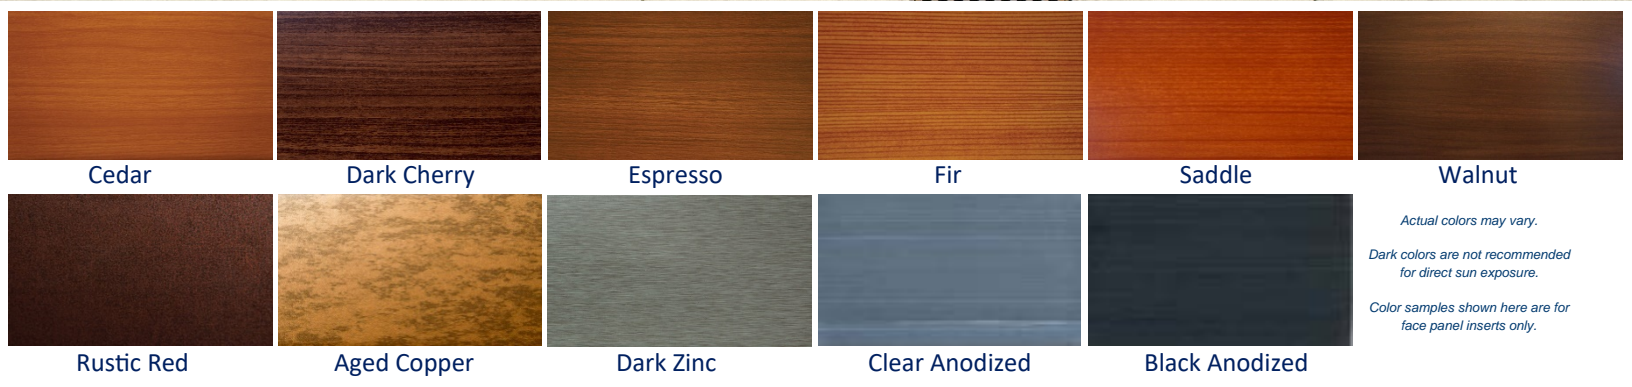

Sunshine Door Premium Face Panels utilize the same light weight strength of 5/8" triple wall polycarbonate in the structure of the door sections.

Choose from; Round or Rectangular Perforated Anodized Aluminum, Stainless Steel, Wood Grain, FauxFinnish Aged Copper, and more. Available with Clear or Colored Polycarbonate Backing.

Premium Face Panels are limited to 10ft widths between exterior vertical stiles.

Modern Wood Grain

Featuring the same light weight strength of triple wall polycarbonate in the structure of the door.

Now with Modern Contemporary EnviroWood & Premium exterior face panels.

Available with continuous exterior panel the full width of the door, (subject to limitations) or with intermediate vertical stiles to suit your design.

Some finishes, including Perforated & Stainless Steel widths are subject to limitations.

Exterior face panels are finished with EnviroWood PVDF Printed Coatings to ASTM standards.

Clear & Black Anodized face panels are heavy gauge sheet aluminum. All exterior face panels are over our standard 5/8" triple wall polycarbonate, thus providing the same structure and triple wall performance of our respected quality "Original" Sunshine Doors.

The panel view on the inside of the door is polycarbonate. (Call for Lead time & availability).
